SUMMARY

Frontend Developer skilled in the MERN stack, with experience building responsive and scalable web applications using MongoDB, Express.js, React, and Node.js. Strong understanding of React, Redux Toolkit, REST API integration, and modern UI development. Experienced in creating full-stack applications with authentication, database management, and API handling. Passionate about clean architecture, performance optimization, and continuous learning.

EDUCATION

B.E. in Computer Engineering (AI & Machine Learning)

Nov 2022 – Present

Lokmanya Tilak College of Engineering, Mumbai

SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Redux Toolkit, Tailwind CSS, Responsive UI Development

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code, Cloudinary, Vercel, Render

Concepts: Authentication, State Management, Component Architecture, API Integration

PROJECTS

Ugram — Social Media Web Application

GitHub — Live Demo

React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS

- Developed a full-stack social media platform with authentication, post creation, image uploads, and profile management functionality.
- Implemented JWT authentication, protected routes, and cookie-based sessions for secure user access control.
- Integrated Cloudinary for optimized image storage and media handling.
- Built responsive UI with real-time like/unlike functionality using optimistic updates and Redux Toolkit.
- Deployed frontend on Vercel and backend on Render with environment-based configuration and REST API integration.

Smart Expense Analyzer

GitHub — Live Demo

React.js, Redux Toolkit, Tailwind CSS, Recharts, localStorage

- Built an expense tracking and analytics application with interactive dashboards for monitoring spending patterns.
- Implemented centralized state management using Redux Toolkit for scalable and efficient data handling.
- Designed responsive UI and integrated dynamic charts using Recharts for real-time expense visualization.
- Added localStorage-based persistence for maintaining user expense data.

Employee Management System

GitHub — Live Demo

React.js, JavaScript, Local Storage

- Developed role-based dashboards and employee task management workflows using React.js.
- Implemented authentication logic, reusable components, and local storage-based data persistence.
- Designed responsive UI components and optimized workflow handling for better user experience.
- Improved maintainability using reusable component architecture.

EXPERIENCE

Aptech Ltd — Junior Server Incharge

Aug 2025 – Sep 2025

- Monitored and maintained server uptime during online examination sessions.
- Collaborated with IT teams to troubleshoot and resolve real-time technical and network-related issues.
- Ensured smooth system performance during high-traffic periods.
